Chapter 1 OLR Intercept System Messages	3
Chapter 2 OLR Import/Export System Messages	9
Chapter 3 OLR Online System Messages	17
Chapter 4 OLR Server Messages	37

Preface About This Guide

This manual provides information describing each message issued by the OLR System. Messages are grouped into categories. The categories are:

- OLR Intercept System Messages
- OLR Import/Export System Messages
- OLR Online System Messages
- OLR Server Messages.

Prefixes

Each group of messages has been assigned a prefix to identify it. The prefixes are:

System	Message Prefix
OLR Intercept System Messages	IS
OLR Import/Export System Messages	IX
OLR Online System Messages	OR
OLR Server Messages.	TS

The sections which follow list messages by the message number, and provide a brief explanation for each.

Notation Conventions

Within OLR System messages, brackets and italics indicate that variable data is inserted. For example: *<response-code>*, *<tranid>*, *<sysid>*, etc.

Chapter 1 OLR Intercept System Messages

This chapter contains the OLR Intercept System Messages, whose assigned prefix is IS.
The messages are listed by number and a brief explanation is provided for each.

Code	Message	Explanation
IS0100	Intercept System terminated.	Confirmation message.
IS0101	Intercept System not active, terminate request ignored.	A request to terminate the Intercept System was not processed because the Intercept System was not active.
IS0102	Intercept System Status transaction terminated.	Confirmation message.
IS0103	Intercept System quiesced.	Confirmation message.
IS0104	Intercept System not active, quiesce request ignored.	A request to quiesce the Intercept System was not processed because the Intercept System was not active.
IS0105	Intercept System reactivated.	Confirmation message.
IS0106	Intercept System not quiesced, reactivate request ignored.	A request to reactivate the Intercept System was not processed because the Intercept System was already active.
IS0107	Intercept System reinitialized.	Confirmation message.
IS0108	LINK to DBXIS010 failed. Intercept System initialization failure.	A CICS error was encountered when attempting to link to DBXIS010. Please check your CICS resource definitions for the program.
IS0109	Load of table DBXORGTB failed. Intercept System not operative.	Please verify CICS resource definitions for DBXORGTB and complete installation of OLR CICS Intercept. (See the Installation Guide).
IS0110	Inquire <release> failed, Resp = <response-code>.	Error when attempting to inquire on release of CICS. Contact DBA Technical Support.
IS0111	Intercept System reinitialized. Overflow on headers/details noted.	Warning. The Intercept System has been reinitialized, but may result in inconsistent intercept results. The actual number of detail records may have exceeded the allotted DETAIL parameter in the OLR CICS Intercept Table.
IS0200	Invalid Intercept System Status entry.	Possible installation problem. Program DBXIS010 was invoked by an unrecognized tranid.
IS0201	OLRINT2 file empty - intercept cannot be activated.	The Intercept file is empty. Please verify complete installation of OLR CICS Intercept. (See Step 7 in Installation Guide).
IS0202	INQUIRE on Tranid=<tranid> failed, resp=<response-code>.	Internal failure on transaction id. Probable installation problem.
IS0203	Table <DBXORGTB> contains bad data - intercept cannot be activated.	Table DBXORGTB has been loaded but contains unrecognizable data. Review installation instructions for generating DBXORGTB.
IS0204	ENABLE Program=<DBXIS020> for EXIT=<XZCATT> failed, Resp=<response-code>.	Internal failure when attempting to activate the intercept user exit. Verify that program DBXIS020 is not disabled.
IS0205	EXTRACT program=<DBXIS020> failed, Resp=<response-code>.	Error when attempting to acquire the intercept exit global error. Contact DBA Technical Support.

Code	Message	Explanation
IS0206	ASSIGN <SYSID> failed, Resp=<response-code>.	Assign failed for SYSID. Probable installation problem. Contact DBA Technical Support.
IS0207	Inquire on File=<OLRINT2> failed, Resp=<response-code>.	An inquire on the Intercept File failed for reason other than SYSIDERR. Contact DBA Technical Support.
IS0208	Maximum details loaded. Increase DETAIL parameter.	Intercept file reached maximum number of details (or screens to be intercepted). Increase, as needed, the DETAIL parameter in DBXORGTB member of your OLR cards dataset, then re-generate DBXORGTB.
IS0209	Maximum headers loaded. Increase PRIME/OFLOW parameters.	Intercept file reached maximum number of headers (or transactions to be intercepted). Increase, as needed, the PRIME and OFLOW parameters in DBXORGTB member of your OLR cards dataset, then re-generate DBXORGTB.
IS0210	Inquire <mapname> failed, Resp=<message>	An intercept attempt encountered the map error shown.
IS0211	Sysid = <sysid> cannot be found in system table, Intercept not activated.	Please provide the correct sysid of the CICS region in the corresponding TYPE=SYSTEM entry in the OLR CICS Intercept Table.
IS0212	Tranid = <tranid> is not defined as remote, Intercept not activated.	The transaction is not defined as remote in the active region. Please verify complete installation of OLR CICS Intercept. (See Step 6 in Installation/Maintenance Guide).
IS0300	Maximum intercept levels exceeded.	An intercept request specified a level number greater than 5.
IS0301	Help/Notes criteria not defined for this screen.	There was no match on intercept criteria for this screen. Check your Intercept criteria for this transaction in the Intercept file. If you are using generic intercept, verify the screen literal value and its screen location.
IS0302	TOR/AOR currency problems. Intercept terminated.	Intercept System in TOR is out of sync with Intercept System in AOR. Reinitialize intercept in both regions. (you must CRTE to AOR to re-initialize Intercept System there).
IS0303	Interception not active, Intercept terminated.	General Intercept System failure. Contact DBA Technical Support.
IS0304	Receive error, DBXIS030 terminates with Abcode=<abcode>.	Internal Intercept System failure. Contact DBA Technical Support.
IS0305	Invalid buffer, DBXIS030 terminates with Abcode=<abcode>.	Internal Intercept System failure. Contact DBA Technical Support.
IS0306	Internal Intercept failure, DBXIS030 ends with Abcode=<abcode>.	Internal Intercept System failure. Contact DBA Technical Support.
IS0307	System error in DBXIS030 - Help/Note request cannot be serviced.	Internal Intercept System failure. Contact DBA Technical Support.
IS0308	Intercept not initialized in AOR, Intercept terminated.	Please initialize the Intercept System Status in the AOR. (You must CRTE to AOR to initialize the intercept there).

Code	Message	Explanation
IS0309	API Feature not currently supported, Intercept terminated.	Intercept was not successful. The Intercept Attach Facility cannot be supported if the API Feature is not licensed at your site. Contact your DBA sales account representative.
IS0310	User IAF Exit requests bypass, Intercept not completed.	Intercept was not successful. The DBXUXIAF user exit program used in the Intercept Attach Facility requested to bypass intercept.
IS0311	User IAF Exit requests end with dump, reason=<reason-code>.	The DBXUXIAF user exit program has ended with a dump and a reason code supplied in the message.
IS0312	User IAF Exit has abended, abcode=<abend-code>.	The DBXUXIAF user exit program has abended with an abend code supplied in the message.
IS0313	User IAF Exit error: <error-code>. Intercept terminated.	Intercept was not successful due to an error from the DBXUXIAF user exit program.
IS0400	ASSIGN for start code failed, Resp=<response-code>.	Assign failed. Contact DBA Technical Support.
IS0401	ENQUEUE Error, ARG=<arg-name>, Resp=<response-code>.	Enqueue failed. Contact DBA Technical Support.
IS0402	Invalid Intercept Restore entry.	Error occurred in restoring your application from the OLR CICS Intercept. Contact DBA Technical Support.
IS0500	Intercept File Maintenance terminated at user request.	Confirmation message.
IS0501	Changes applied successfully.	Confirmation message.
IS0502	Cursor not on active entry.	Your cursor is on an entry that is not active.
IS0503	<Field-name> is a required field.	The named field may not be blank.
IS0504	<Value> entered is invalid.	You have entered a value that is invalid.
IS0505	Lock Table is full, entry cannot be processed.	Your request could not be processed because the Lock Table is currently full. Please try again later.
IS0506	Entry currently in use at Term=<term-id>.	The entry you selected cannot be updated because it is currently held by another user. Please try again later.
IS0507	Changes pending on this screen, detail maintenance not allowed.	Changes were made for this screen that have not been applied. Please press ENTER to apply changes on this screen.
IS0508	Header has details - Intercept Type cannot be changed.	You cannot change the Intercept type for this transaction because it has detail criteria.
IS0509	Header has details - delete not allowed.	You cannot delete this transaction because it has detail criteria.
IS0510	System Error - concurrent update detected.	An intercept header record was updated by another user - your updates cannot be applied.
IS0511	Another record with this key already exists on the file.	You have added a transaction/PFkey/intercept-type combination that already exists.

Code	Message	Explanation
IS0512	A record with this key already entered on Screen.	You have added a screen criteria entry that already exists for this transaction.
IS0513	Detail count for header does not match details found.	The displayed number of details for this transaction does not match the actual number of details. Please verify detail criteria for this transaction.
IS0514	Invalid Intercept File Maintenance entry.	Valid Intercept File Maintenance entry is through transaction OLRM only.
IS0515	System error - No header found for these details.	Internal system error. Contact DBA Technical Support.
IS0516	No action taken - key was changed for this detail.	Your request was not processed because the screen id (key) for this detail has been changed.
IS0517	No action taken - duplicate for this detail found on file.	Your request was not processed because a duplicate detail entry exists in the Intercept file.
IS0518	No action taken - duplicate for this detail found on screen.	Your request was not processed because a duplicate screen criteria entry exists for this transaction.
IS0519	Nothing to display.	No data in Intercept File to display.
IS0520	Nothing more to display.	You have reached the end of display.
IS0521	At beginning of display.	You have reached the beginning of display.
IS0522	<ddname> DDname selected.	Information message
IS0523	Record deleted.	Information message
IS0524	Record added.	Information message
IS0600	Lock Table Maintenance terminated at user request.	Confirmation message.
IS0601	Cursor not on active entry.	Your cursor is on an entry that is not active.
IS0602	Lock Table entry purged.	Confirmation message.
IS0603	Lock Table purged.	Confirmation message.
IS0700	Invalid Trace Display Entry.	Internal Intercept Trace Table error. Contact DBA Technical Support.
IS0701	XCTL to DBXIS000 failed, Resp=<response-code>.	Internal Intercept Trace Table error. Contact DBA Technical Support.
IS0702	Bad Input Params, execution Terminated.	Internal Intercept Trace Table error. Contact DBA Technical Support.
IS0703	Mapping Problem on SEND, Resp=<response-code>.	Internal Intercept Trace Table error on SEND. Contact DBA Technical Support.
IS0704	Receive Failed, Resp=<response-code>.	Internal Intercept Trace Table error on RECEIVE. Contact DBA Technical Support.
IS0800	OLR External Intercept ended normally.	Information message
IS0801	OLR Intercept not active.	Information message
IS0802	External Intercepts not Supported.	This installation is not configured to support external intercept criteria.

Code	Message	Explanation
IS0803	External Intercept Specification error.	An error was found in the external intercept criteria.
IS0899	OLR External Intercept ended with errors.	The intercept system failed with an error. Contact DBA Software.
IS9500	LINK to <program-name> failed, Resp=<response-code>.	CICS failure during XCTL to DBXIS000 program. Contact DBA Technical Support.
IS9501	XCTL to <program-name> failed, Resp=<response-code>.	CICS failure during XCTL to program named. Please verify CICS definitions for the program. If further problems, contact DBA Technical Support.
IS9502	Load of table <table-name> failed, Resp=<response-code>.	CICS failure loading table named. Please verify CICS definitions for the table. If further problems, contact DBA Technical Support.
IS9503	Getmain failed, Program=<program-name>, Resp=<response-code>.	GETMAIN failed. Contact DBA Technical Support.
IS9504	TSQ error, QID=<queue-name>,OP=<op-code>, Resp=<response-code>.	TSQ request failed. Contact DBA Technical Support.
IS9505	I/O error, File=<OLRINT2>, OP=<op-code>, Resp=<response-code>.	An I/O request on Intercept File failed. Please verify CICS definitions for the file. If further problems, contact DBA Technical Support.
IS9506	START on <program-name> failed, Resp=<response-code>.	An IC START of tranid noted failed. Please verify CICS definitions for the transaction. If further problems, contact DBA Technical Support.
IS9507	SEND Map=<map-name> failed, Resp=<response-code>.	A BMS Map SEND request failed. Please verify CICS definitions for the map. If further problems, contact DBA Technical Support.
IS9800	PF Key not active.	You have pressed a PF key that is not active.
IS9997	Fatal error in Program: <program-name> Reason=<reason-code>.	An unrecoverable error occurred in program noted. Contact DBA Technical Support.
IS9998	Msg <message-code> could not be found in DBXISMSG.	Internal failure in program DBXIS900. The message named could not be found. Contact DBA Technical Support.
IS9999	Unspecified error - specified elsewhere.	General internal failure. Contact DBA Technical Support.

Chapter 2 OLR Import/Export System Messages

This chapter contains the OLR Import/Export System Messages, whose assigned prefix is IX.

The messages are listed by number and a brief explanation is provided for each.

Code	Message	Explanation
IX0001	Signon accepted.	Informational.
IX0002	SKIP encountered. Skipping to ENDSKIP or end of input.	This message marks the beginning of SKIP processing. Commands following the SKIP command will be bypassed until an ENDSKIP is detected.
IX0003	ENDSKIP encountered, resume normal processing.	This message marks the end of SKIP processing. Subsequent commands will be processed normally.
IX0004	SKIP already active, this SKIP ignored.	SKIP processing was active when a SKIP command was encountered. SKIP processing will continue.
IX0005	ENDSKIP ignored, no SKIP currently active.	SKIP processing was not active when an ENDSKIP was encountered. Command processing will continue.
IX0006	Set Options reset to defaults.	Confirmation message.
IX0007	Set Options altered.	Confirmation message.
IX0008	Current Set Options: NOCC/CC , LNCT=<nn>, NOREPL/REPL, DKP/NODKP, SHOWQUAL/HIDEQUAL	Displays active Set Options.
IX0020	Topic added.	Confirmation message.
IX0021	Topic replaced.	Confirmation message.
IX0022	Topic updated.	Confirmation message.
IX0023	Topic deleted.	Confirmation message.
IX0024	Copy topic request generated.	Confirmation message.
IX0025	<nnnn> Copy topic request(s) generated.	Confirmation message.
IX0026	<nnnn> Topic(s) deleted.	Confirmation message.
IX0027	<nnnn> Copy topic with text request(s) generated.	Confirmation message.
IX0028	<nnnn> new Topic(s) added.	Confirmation message.
IX0029	<nnnn> Copy topic with tags request(s) generated.	Confirmation message.
IX0030	Topic text added.	Confirmation message.
IX0031	Topic text updated.	Confirmation message.
IX0032	Topic text replaced.	Confirmation message.
IX0033	Topic text deleted.	Confirmation message.
IX0034	Copy text (topic) request generated.	Confirmation message.
IX0035	@@END encountered, normal processing resumes	Information message. Flush to next valid command terminates.
IX0036	Note text added.	Confirmation message.
IX0037	Note text updated.	Confirmation message.
IX0038	Note text replaced.	Confirmation message.
IX0039	Note text deleted.	Confirmation message.
IX003A	Copy text (note) request generated.	Confirmation message.

Code	Message	Explanation
IX003B	<nnnn> Copy text request(s) generated.	Confirmation message.
IX0040	<nnnn> Subtopic(s) added.	Confirmation message.
IX0041	<nnnn> Subtopic(s) replaced.	Confirmation message.
IX0042	<nnnn> Subtopic(s) updated.	Confirmation message.
IX0043	<nnnn> Subtopic(s) appended.	Confirmation message.
IX0044	Copy Subtopics request generated.	Confirmation message.
IX0045	Outline defined.	Confirmation message.
IX0046	Copy Outline request generated.	Confirmation message.
IX0047	<nnnn> Copy Subtopics request(s) generated.	Confirmation message.
IX0048	<nnnn> subtopics appended.	Confirmation message.
IX0050	Help Link added.	Confirmation message.
IX0051	Help Link replaced.	Confirmation message.
IX0052	Help Link updated.	Confirmation message.
IX0053	Help Link deleted.	Confirmation message.
IX0054	Copy Help request generated.	Confirmation message.
IX0055	<nnnn> Copy Help request(s) generated.	Confirmation message.
IX0056	<nnnn> Help link(s) deleted.	Confirmation message.
IX0057	<nnnn> Copy help link request(s) generated.	Confirmation message.
IX0058	<nnnn> Delete All Help command request generated.	Confirmation message.
IX0060	<nnnn> Keyword(s) added/linked.	Confirmation message.
IX0061	<nnnn> Keyword(s) replaced.	Confirmation message.
IX0062	<nnnn> Topic keyword(s) dropped.	Confirmation message.
IX0063	Copy Note(s) request generated.	Confirmation message.
IX0064	Copy Keyword(s) request generated.	Confirmation message.
IX0065	Keyword list defined.	Confirmation message.
IX0066	<nnnn> Orphan keyword(s) deleted.	Confirmation message.
IX0067	<nnnn> Copy keyword request(s) generated.	Confirmation message.
IX0070	Note added.	Confirmation message.
IX0071	Note replaced.	Confirmation message.
IX0072	Note updated.	Confirmation message.
IX0073	Note deleted.	Confirmation message.
IX0074	Copy Note request generated.	Confirmation message.
IX0075	<nnnn> Note(s) deleted.	Confirmation message.
IX0076	<nnnn> Copy note with text request(s) generated.	Confirmation message.

Code	Message	Explanation
IX0077	<nnnn> Note(s) transferred.	Confirmation message.
IX0078	<nnnn> Copy note with text request(s) generated.	Confirmation message.
IX0100	Topic print request generated.	Confirmation message.
IX0101	Outline print request generated.	Confirmation message.
IX0103	Note print request generated.	Confirmation message.
IX0104	PRINT ALL NOTES request generated.	Confirmation message.
IX0105	PRINT ALL TOPICS request generated.	Confirmation message.
IX0106	PRINT ALL HELP request generated.	Confirmation message.
IX0110	Tag list defined	Confirmation message.
IX0111	<nnnn> tags added.	Confirmation message.
IX0112	<nnnn> Copy Tags request(s) generated.	Confirmation message.
IX0130	Field added.	Confirmation message.
IX0131	Copy field request generated.	Confirmation message.
IX0132	Field deleted.	Confirmation message.
IX0800	WARNING(S) returned by OLR/Server, as follows:	Warning. Command was processed, however OLR/Server returned warnings. See OLR/Server messages for an explanation of the messages that follow this message in the Recycle File.
IX0801	WARNING: Text lines of more than 72 characters were truncated.	Warning. A text line was truncated because it exceeded the maximum line size.
IX0802	WARNING: Topic has no subtopics; no subtopics were dropped.	Warning. An attempt to drop subtopics from a topic was made, but there were no subtopics found.
IX0805	WARNING: Text lines containing unprintables were translated.	Warning. The topic contained unprintable characters, which were translated to spaces.
IX0900	Skipping to next command. Errors found in syntax:	Syntax errors were found. Messages describing the syntax errors will follow. Records following this one in the input file will be bypassed until the next command is found.
IX0901	Set command errors found in syntax:	Syntax errors were found in a Command. Messages describing the syntax errors will follow. Records following this one in the input file will be bypassed.
IX0902	KEYWORD exceeds maximum length: <xxxxx>	Extra data appears as part of a valid keyword. The string in question will appear after the colon. Make sure you are using only the keywords shown in the description of the syntax. Make sure that you have placed quotes around items which are values supplied by you rather than keywords, and that there is a space between words.
IX0903	Value exceeds maximum length: <xxxxx>	The value found between quotes is too long. The string in question will appear after the colon. Verify the length of the value.

Code	Message	Explanation
IX0904	Unused KEYWORD/Value: <xxxxx>	This error occurs under a variety of situations. Most commonly, it will occur when unrecognized keywords or values are included with a valid command. The string in question will appear after the colon.
IX0905	Unmatched quotation marks: <xxxxx>	Values supplied by the user must be enclosed in quotes. Single or double quotes may be used as long as they are used consistently (either both single or both double). Double quotation marks must be used when the value itself contains a single quote. By the same token, single quotation marks must be used when the value itself contains a double quote.
IX0906	Value non-numeric, out of range: <xxxxx>	A value supplied by the user that was required to be numeric was not numeric, or did not fall within a valid range.
IX0907	Date format invalid.	A date supplied by the user was not a valid date.
IX0950	Ignored. No text input. Flushing for next valid command.	No text was provided for a topic. Processing will resume at the next valid command.
IX0951	Unrecognized command. Flushing for next valid command.	The command was not recognized. Processing will resume at the next valid command.
IX0952	Command too long. Flushing for next valid command.	The command was not recognized, and was longer than expected. Processing will resume at the next valid command.
IX0953	Skipping to next command. Subcommand out of context.	A subcommand was encountered without its associated command. For example, a text subcommand (@@H, @@P) is only valid when found between @@TEXT and @@END commands.
IX0954	User ID not supplied. Flushing to end of run.	A valid Signon is required before any processing is allowed. This error results when a Signon command had errors. Records following this one in the input file will be bypassed. Fatal error.
IX0955	Set Command conflicts. Flushing to end of run.	A Set command was encountered that could not be processed because conflicting options were specified. Records following this one in the input file will be bypassed. Fatal error.
IX0956	Flushing to end of run on Set Command errors.	A Set command was encountered that could not be processed due to syntax errors. Records following this one in the input file will be bypassed. Fatal error.
IX0957	Frame and flow keywords are mutually exclusive.	A Print command could not be processed because both FRAME and FLOW keywords were used.
IX0958	@@END not found where expected. Command suppressed.	An @@ keyword was found following an @@TEXT command before an @@END command had been encountered. The preceding TEXT command could not be processed.
IX0959	Flushing to end of run on OLR/Server fatal errors.	An OLR/Server fatal error has been detected. Records following this one in the input file will be bypassed. Fatal error.
IX0960	Signon must be first command. Flushing to end of run.	The Signon command was not found as first command in input file. No command could not be processed.

Code	Message	Explanation
IX0961	TOPIC and NOTE keywords are mutually exclusive.	A text command could not be processed because both TOPIC and NOTE keywords were used.
IX0962	Ignored. No subtopic input. Flushing for next valid topic.	A subtopic was expected, but was not found. Check your input file.
IX0963	Ignored, no outline input. Flushing for next valid command.	An attempt was made to define outline but there was no outline in the input file. Check your input file.
IX0964	Ignored, no subtopic input. Flushing for next valid command.	An attempt was made to add or change subtopics but there were no subtopics in the input file. Check your input file.
IX0965	Invalid hierarchy level sequence.	There was an error in using level symbols to indicate a subtopic's level within the outline. Check the level sequence in your input file.
IX0966	Maximum hierarchy level exceeded.	The maximum of 10 (levels) has been exceeded, counting the top topic as the first level in hierarchy. Outline command could not be processed.
IX0967	Level symbol "+" required when defining an outline.	No "+" symbols found before one of the topic titles in the outline. Level could not be determined. Outline command could not be processed.
IX0968	Subtopic in error: <subtopic title>	The identified subtopic was invalid due to an edit failure. Outline command could not be processed.
IX0969	Invalid keyword used with command.	The command could not be processed because of an invalid keyword.
IX0970	Ignored, no keyword input. Flushing for next valid command.	The command could not be processed because a command keyword value was not provided.
IX0971	If topic title provided, NOTE keyword is required.	For a DROP ALL KEYWORDS command, the topic title only applies for notes.
IX0972	DJDE option applicable only for WITH TEXT request.	The DJDE option is available only when printing an outline with text.
IX0990	Errors returned by OLR/Server, as follows:	OLR/Server could not process this command due to errors. See OLR/Server messages for an explanation of the messages that follow this message in the Recycle File.
IX0991	Ignored. No tag(s) input. Flushing for next valid command.	Tags were expected but not found. Check your input file.
IX0992	Tag in error.	The tag was not in the valid format.
IX0993	Copy tags request generated.	Confirmation message.
IX0994	Tag invalid. Flushing for next valid command.	The tag was not formatted properly.
IX0995	Ignored, no field(s) input. Flushing for next valid command.	A field command was expected but was not encountered.
IX0996	Field in error: <field>	The field shown was in error. Please check your input.
IX2411	Userid is not authorized to delete topics in group.	Warning. The user is not authorized to delete all topics in the group.
IX2412	Topic not deleted: <topic title>	Warning. The identified topic was not deleted due to error in attempt to delete.

Code	Message	Explanation
IX2412	Topic not copied: <topic title>	Warning. The identified topic was not pre-purged (copied) due to error in attempt to pre-purge.
IX5401	Help Link not deleted: <help link>	Warning. The identified help link was not deleted due to error in attempt to delete.
IX5401	Help Link not copied: <help link>	Warning. The identified help link was not pre-purged (copied) due to error in attempt to pre-purge.
IX5402	Userid is not authorized to delete help links for group topics.	Warning. The user is not authorized to delete help links that use topics in the identified group.
IX7401	Userid is not authorized to delete notes in group.	Warning. The user is not authorized to delete all notes in the group.
IX7402	<nnnn> note(s) in group were not deleted.	Warning. Due to lack of delete authority, this number of notes in the group that satisfy the delete criteria were not deleted.
IX7403	Note not deleted: <note title>	Warning. The identified note was not deleted due to error in attempt to delete.
IX7403	Note not copied: <note title>	Warning. The identified note was not pre-purged (copied) due to error in attempt to pre-purge.

Chapter 3 OLR Online System Messages

This chapter contains the OLR Online System Messages, whose assigned prefix is OR.

The messages are listed by number and a brief explanation is provided for each.

Code	Message	Explanation
OR0100	Topic '<title:qualifier>' added.	Confirmation message.
OR0101	Topic profile changed.	Confirmation message.
OR0102	Topic '<title:qualifier>' deleted.	Confirmation message.
OR0103	GROUP required.	Enter the name of an existing Group in the GROUP field. It may not be blank.
OR0104	Title required.	Enter a title in the TITLE field.
OR0105	'Alias of' title required when qualifier is entered.	You have typed a qualifier for an 'alias of' topic, but no title. If you want to make the active topic an alias, you need to supply both the title and qualifier for the base topic. If you don't want the active topic to be an alias, both the 'alias of' topic and qualifier should be blank.
OR0106	No topic is currently marked.	You have not marked a topic. The function you have requested cannot be performed without a marked topic.
OR0107	Private Text cannot be 'Y' for topic that is an alias.	Topics that are aliases cannot be marked as private.
OR0111	No books found for <group name>.	There are no book level topics in the named Group.
OR0112	No orphaned topics found for <group name>.	There are no orphaned topics in the named Group.
OR0113	No topics found for <group name>.	There are no topics in the Group named in the message.
OR0114	Topic does not exist.	A topic included in the subtopic list being built could not be found in the database. Verify that you have typed the topic title correctly, and included the qualifier if the topic has one.
OR0115	Book cannot be 'Y' for Add Topic out of Change Outline.	You have attempted to add a topic as a book from the Change Outline screen. If you want the new topic to be included in the outline you are developing, do not designate the new topic as a book. If you want the new topic to be a book, add the topic from the another screen.
OR0116	ADDNEW function disabled for this window.	The ADDNEW function is not available when adding topics from the Change Outline screen.
OR0117	'Alias of Marked Topic' not valid when 'Alias of' topic entered.	You can either make the active topic the alias of the marked topic, or the alias of the topic specified as the 'Alias of' topic. You are attempting to do both.
OR0118	A topic cannot be an alias of itself.	If you want the active topic to be an alias, you must provide the name of another topic you want it to be an alias of.
OR0119	Group changed from <previous group> to <next group>.	You have switched your topic list from the previous group to the next group.
OR0120	Too many topics selected. Press F3 to end or F4 to clear selection.	You have selected more than the maximum number (20) of topics allowed. Either end or reset your selection.
OR0121	Selection cleared for topics in <group name>.	Your topic selection was cleared and reset when you switched to the group specified in the message.
OR0122	Group set to <group name>.	The topic (or book) list in the group you requested is displayed.

Code	Message	Explanation
OR0123	Selection cleared.	Your selection has been cleared and reset.
OR0124	Update lock on topic unlocked.	Confirmation message.
OR0500	Text deleted.	Confirmation message.
OR0501	No text.	The active topic has no text.
OR0502	Edit not allowed: topic is alias of <title:qualifier>.	You have attempted to edit the text of a topic which is an alias. You must edit the text for the topic which owns the text. The title of that topic is shown in the message.
OR0503	End of text reached.	The last line of text for this topic has been displayed.
OR0504	Beginning of text reached.	The first line of text for this topic has been displayed.
OR0505	Added: <mm/dd/yy> <userid>. Changed: <mm/dd/yy> <userid>.	The ID of the user who added the object and the date when it was added are displayed.
OR0511	Specify a topic title as well.	You have provided a Qualifier, but no Title. A Title is required.
OR0513	Edit not allowed: topic is an alias.	You have attempted to edit the text of a topic which is an alias. You must edit the text for the topic which owns the text.
OR0514	Added: <mm/dd/yy> <userid>.	The ID of the user who added the object and the date when it was added are displayed.
OR0515	Invalid request: cursor must be placed on a text line.	The function you have requested cannot be performed unless the cursor is on a text line.
OR0516	<Line/Page> size specified is invalid.	You have specified a linesize or pagesize which is not numeric.
OR0517	<Line/Page> size specified is out of range.	You have specified a linesize or pagesize which is not within the range allowed. Maximum linesize is 72; maximum pagesize is 18.
OR0518	Page number specified is invalid.	The page number you typed as part of a paging command was not numeric.
OR0519	Line number specified is invalid.	The line number you typed as part of a paging command was not numeric.
OR0520	<Line/Page> size changed to: <nnn> from: <nnn>.	Confirmation message.
OR0521	Current <line/page> size: <nnn>.	The current linesize/pagesize is displayed, as requested.
OR0522	<Line> size changed to: <nnn> from: <nnn>. Truncation warnings issued.	The current linesize has been changed. Text lines affected may have been truncated.
OR0523	<Line/Page> size changed from: <nnn> to maximum allowable size <nnn>.	Confirmation Message.
OR0524	Find value error: unmatched quotes.	Quote is either unmatched or missing at the beginning or at the end of the find value. If the find value contains any single quote, use double quotes with the find command.
OR0525	Find value error: value is too long.	The find value exceeds maximum length of 32 characters.
OR0526	Find value error: only one find value allowed.	There are too many find values specified; only one find value is allowed.

Code	Message	Explanation
OR0527	Command parse failed: ERRCODE = <i><error code></i> .	An unexpected error has occurred. Please call DBA Inc. Technical Support.
OR0528	<i><Find value></i> found.	The find value was found within the text of active topic.
OR0529	<i><Find value></i> not in text.	The find value was not found within the text of active topic.
OR0530	Find is not currently active.	The user tried to invoke FINDNEXT, but no previous find command with find value was used.
OR0531	FIND text failed: ERRCODE = <i><error code></i> .	An unexpected find error has occurred. Please call DBA Inc. Technical Support.
OR0532	End of text reached; <i><find value></i> not found.	You have tried to invoke FINDNEXT, but find value was not found up to the end of text of active topic.
OR0533	Text stream generate failed with ERRCODE= <i><error code></i> .	An unexpected find error has occurred. Please call DBA Inc. Technical Support.
OR0534	FIND hilight failed --- ERRCODE = <i><error code></i> .	An unexpected find error has occurred. Please call DBA Inc. Technical Support.
OR0535	No further occurrences of <i><find value></i> in outline.	You have tried to invoke a find through the outline (extended find), but the find value could not be found up to the end of the outline.
OR0536	FIND ended - <i><find value></i> not found.	User has terminated a find through the outline.
OR0537	No action taken --- text line limit will be exceeded.	Warning. While editing text, you used line commands that will cause the text to exceed text line maximum. Your edit commands were ignored. Reset your edit commands, tailor down the text size, or talk to your OLR System Administrator about the text line maximum setting.
OR0539	Number of pages exceeds system max. Text truncated.	Warning. While reading and paging through text, you have reached the part of text that has exceeded the page limit. This part of text cannot be displayed. Tailor down the text size, or talk to your OLR System Administrator about the text line maximum setting.
OR0540	The cursor is not on an active jump spot.	Jump cannot be completed because the cursor is not on an active hypertext link.
OR0541	Tag <i><tagid></i> not found.	Modify tag cannot be completed because the requested tagid does not exist.
OR0542	Tag <i><tagid></i> deleted.	Confirmation message.
OR0543	Tag <i><tagid></i> changed.	Confirmation message.
OR0544	Tag <i><tagid></i> added.	Confirmation message.
OR0545	No action taken.	Information only. No data entered, no action taken.
OR0546	Topic can not be blank.	Topic title must be provided.
OR0547	Topic selected from list, press ENTER to register.	Topic selected will be associated with the hypertext jump tagid.
OR0548	TAG field format is invalid	Tagid entered has an invalid format.
OR0549	Tag ID required.	Tagid is required.

Code	Message	Explanation
OR0550	Cursor is not on a valid LINK.	The cursor is not on a valid tagid. The tag information cannot be displayed.
OR0551	Add new TAG.	Information message.
OR0552	Tag <tagid> already exists.	The tag you are attempting to add already exists.
OR0553	Jump topic not defined.	The jump topic you have entered on a tag definition does not exist.
OR0554	Tags not allowed without text.	You may not add tags until you have saved your text.
OR0555	Jump not active: max jump levels exceeded.	The max jump level is 15. You may not jump past this level.
OR0556	The topic linked to this jump spot has no text.	You have jumped to a topic that has no text to display.
OR0557	Must save text before processing links.	Save your text prior to doing link operations.
OR0558	Text exists; you cannot copy into this topic.	You cannot copy text into a topic that already has text.
OR0559	No text exists -- COPY unsuccessful.	You have attempted to copy text from a topic that has no text.
OR0560	Copied successfully - Text: <nnn> Tags: <nnn> Keywords: <nnn>.	Confirmation message.
OR0561	Text stream detext failed with ERRCODE = <nnnn>.	System error. Contact DBA Technical Support.
OR0562	Field '<fieldname>' invalid.	In your field definition, you have entered an invalid field type or length. The cursor will be on the bad data.
OR0563	Field '<fieldname>' changed.	Confirmation message.
OR0564	Value is too long.	Field value may not exceed 32 bytes.
OR0565	Spaces not allowed within field name.	A field name may not contain embedded blanks.
OR0566	'OR' prefix is for OLR System Variables only.	User field names may not begin with "OR". "OR" is reserved.
OR0567	1st character of field must be 'A' - 'Z'.	Field name must start with an alpha 'A' - 'Z'.
OR0568	Cursor is not on a valid Pick value.	Sticky cursor function cannot be completed.
OR0569	Value '<value>' Picked.	Sticky cursor confirmation message.
OR0570	Field is required.	Field is required.
OR0600	User Exit <program-name> failed with ERRCODE = <error code>.	The named User Text Exit program has returned to the OLR System with a "failure" return code, supplying the error-code in the message.
OR0601	CICS error linking User Exit <program-name> - no text retrieved.	CICS has returned an error when attempting to link to the named User Text Exit program. Check your CICS resource definition for the program.
OR0602	User Exit specification does not contain an exit name.	The NAME: keyword was not found, or the name supplied was blank. This keyword and the user-supplied load program name should be supplied in the Indirect Link Definition for a User Text Exit program.

Code	Message	Explanation
OR0603	User Exit specification contains an invalid or unrecognized field.	In the Indirect Link Definition for a User Text Exit program, an unrecognized keyword was found, or a keyword value was omitted or invalid.
OR0604	User Exit load exceeded system limit, load incomplete.	A User Text Exit program returned more text than the system allows. Only the system's maximum number of lines will be displayed.
OR0605	User Exit <program-name> returned invalid information.	This is a general purpose error condition arising from bad data returned by the named User Text Exit program, e.g. an unrecognizable return code.
OR0606	User Exit <program-name> returned invalid line attributes.	The named User Text Exit program returned attribute indicators in a text line prefix that are invalid.
OR0607	User Exit <program-name> overlaid system storage.	The input parameter area passed to a User Text Exit program has been altered by program - this is not allowed.
OR0608	User Exit <program-name> abended with ABCODE = <abend code>.	The named User Text Exit program has abended with the abend code supplied in the message.
OR0609	User Exit <program-name> failed with unidentified error.	The OLR System detected an error that may be internal to processing within the named User Text Exit program.
OR0610	User Exit <program-name> returned invalid Line/Page Size.	The named User Text Exit program has specified a line or page size that is invalid. Line size value is between 1 and 72; page size value is between 1 and 1.
OR1000	A topic cannot be a subtopic of itself.	A topic cannot be on two consecutive levels of an outline.
OR1001	No subtopics.	The active topic has no subtopics.
OR1003	SAVE not performed: at least one topic in error.	At least one topic in the subtopic list could not be made a subtopic of the active topic. Subtopics in error are highlighted. Verify that each subtopic highlighted actually exists in the OLR/Server database, that its fully qualified name has been used, and that no topic or Group level restrictions apply that would prevent it from being eligible for use in the outline. (NOTE: topics that are owner restricted or are in owner-restricted Groups cannot be used in outlines outside their Group.)
OR1004	Invalid request; more than one action used.	You specified more than one location in your outline for insertion of the topic you are trying to add. Only one insert location can be specified before adding a topic. Please delete the extra action commands.
OR1005	No topic was added.	You left the Add Topic window without adding a topic.
OR1006	Subtopic '<title:qualifier>' added.	The topic named in the message has been added to the database, and included as the last topic in the subtopic list of the active topic.
OR1007	Subtopics dropped from outline.	Confirmation message. Topics that were previously listed as subtopics of the active topic are no longer subtopics of the active topic. They have not been deleted from the database. The active topic now has no subtopics.
OR1008	End of outline reached.	You have paged to the end of the outline. PF8 is no longer active.
OR1009	Beginning of outline reached.	You have paged to the beginning of the outline. PF7 is no longer active

Code	Message	Explanation
OR1010	Repositioned at beginning of outline - concurrent update detected.	The outline you are working with is being modified by another user. Since it is not possible to return you to your previous position in the outline, you have been returned to the beginning of the outline.
OR1011	Paging between topics disabled - concurrent update detected.	The outline you are viewing is being modified by another user. You will not be able to page between topics in this outline until the outline is available.
OR1012	Subtopic '<title:qualifier>' inserted.	The topic in the message has been inserted into the subtopic list.
OR1013	<n> selected topic(s) inserted as subtopic(s).	The topic(s) you selected have been inserted into the subtopic list.
OR1100	HELP not defined for requested Help Location.	No Help Topic is currently linked to the field your cursor was on when you pressed the Help key.
OR1101	Help Link for <help-location> added.	Confirmation message.
OR1102	Help Link changed.	Confirmation message.
OR1103	Help Link for <help-location> deleted.	Confirmation message.
OR1104	Invalid request: no active Help Link.	The requested function is not available due to the fact that no Help Link is currently active.
OR1105	No Help Links found.	There are no Help Links in the database.
OR1106	No Help Links found for <Application>.	There are no Help Links in the database for the active Application.
OR1107	Warning: 'PICK' value truncated to fit target field.	The value your cursor was on when you made a 'sticky cursor' request was longer than the field on your application screen it was to be moved into. The value was truncated.
OR1108	'PICK' not performed: target field protected.	Your 'sticky cursor' request could not be satisfied because the field on your application screen is not a data entry field.
OR1109	'PICK' not performed: target field out of sync with Help Link.	Your 'sticky cursor' request could not be satisfied because the field on your application screen does not match up to the Help Link field description.
OR1110	'PICK' not performed: 'Pick' value blank.	The value your cursor was on when you made a 'sticky cursor' request was blank.
OR1111	The topic linked to this help location has no text.	For this Help Location, you are using a topic that has no text.
OR1112	Level <help-level > Help Link for <help-location> added.	Confirmation message.
OR1113	Level <help-level> Help Link for <help-location> deleted.	Confirmation message.
OR1114	A Help Link that uses a Base Help Link cannot be marked.	From the Select Help Link screen, you cannot mark this Help Link that uses a Base Help Link since it does not own an active topic.
OR1115	Base Help Link used -- changes must be made to Base Help Link.	The active Help Link refers to a Base Help Link. Any changes to Extended Help must be made to the Extended Help defined for the Base Help Link.

Code	Message	Explanation
OR1116	Help mode set to <writer/reader>.	You have set the help mode to either writer or reader, as indicated in the message.
OR1117	Help mode not changed: <Userid> already in <writer/reader> mode.	You attempted to set the help mode that is already active.
OR1118	<Writer/Reader> mode not set: User Attribute Table not active.	The help mode cannot be changed because the User Attribute Table is not active. Talk to your OLR System Administrator about using the User Attribute Table.
OR1119	<Writer/Reader> mode not set: unable to identify user.	You cannot change the help mode if you are have not signed on to CICS.
OR1120	<Writer/Reader> mode not set: User Attribute Table full. Try again later.	Talk to your OLR System Administrator about resetting the User Attribute Table.
OR1121	<Userid> not authorized to change help mode.	You may not change your help mode.
OR1122	Update lock on help link unlocked.	Confirmation message.
OR1200	No notes for this topic found in <GROUP>.	There are no notes for the active Topic in the named Group. To check for notes in another Group, type the name of the group at the ==> and press enter.
OR1201	Note '<title:qualifier>' added.	Confirmation message.
OR1202	Note '<title:qualifier>' deleted.	Confirmation message.
OR1203	Note profile changed.	Confirmation message.
OR1204	Note not found. Press F3 to continue.	For a note request in OLR Attach Facility (OLRAPI), the note requested for read or update is not found in the database. Press F3 to go back to your application.
OR1205	Note already exists. Press F3 to continue.	For a note request in OLR Attach Facility (OLRAPI), the note requested to be added already exists in the database. Press F3 to go back to your application.
OR1206	Update lock on note unlocked.	Confirmation message.
OR1207	No notes for this topic found. Press F3 to continue.	For a note request in OLR Attach Facility (OLRAPI), there are no notes found for the requested topic, or the topic does not exist in the database. Press F3 to go back to your application.
OR1208	No notes found in group <groupid>.	
OR1209	Text can not be copied into a NOTE.	A Note may be the recipient of copied text.
OR1210	Invalid priority number.	Priority number must be '1' to '9'.
OR1211	Priority not allowed.	Note priority is not an active feature at your installation..
OR1212	FORM not found.	The form you have requested does not exist.
OR1213	Qualifier without Form is not valid.	Form name consists of both title and qualifier.
OR1300	No Groups found.	There are no groups defined in the OLR System.
OR1301	No users have been registered to <Group>.	This group has no group-users. No users can access topics, notes and outlines in this group.
OR1302	No users have been registered.	There are no users registered in the OLR System.
OR1303	No administrators have been assigned.	This group has no group-administrators.

Code	Message	Explanation
OR1304	Group '<Groupname>' added.	The Systems Administrator has just defined and added this group to the OLR System.
OR1305	Group profile changed.	The Group Administrator has just updated this group's attributes and characteristics.
OR1306	User '<Userid>' added.	The Systems Administrator or the User Administrator has just registered a user to the OLR System.
OR1307	User profile changed.	The User Administrator has just updated this user's preferences and privileges in the OLR System.
OR1308	USER required.	When registering a user to the OLR System or when adding an administrator, you must enter the userid in the USERID field.
OR1309	User '<Userid>' registered to <Group>.	The Group Administrator has added this user to this group.
OR1310	Group user profile changed.	The Group Administrator has updated this user's access in the group.
OR1311	'<Entry>' is not a valid <Topic/Note> access code.	The code you entered is not a valid Topic Access Code or Note Access Code. For Topic Access Code, enter a value from 1 to 5. For Note Access Code, enter a value from 1 to 4. The meanings of each code are displayed on the Group Profile window.
OR1312	'Manager' not valid for note access.	You have entered "5" as the Note Access code. This is invalid since manager access does not apply to notes.
OR1313	Administrator '<userid>' added.	This user has been defined as a Group Administrator or a User Administrator.
OR1314	Administrator profile changed.	This Administrator's authority to grant administrative privilege has been updated.
OR1315	Administrator '<userid>' dropped.	This Administrator's authority has been dropped. This user is no longer an Administrator, but still is a registered user in the OLR System.
OR1316	Group <groupname> deleted.	The System Administrator has deleted this group from the OLR System.
OR1317	User '<userid>' deleted.	The System Administrator or the User Administrator has deleted this user from the OLR System.
OR1318	Dropped <Group> User '<userid>.	The Group Administrator has deleted this user's access to this group. This user is no longer a group-user in this Group, but is still a registered user in the OLR System.
OR1319	Invalid help mode.	Help mode for user must be 'Reader' or 'Writer'.
OR1320	Update lock on user unlocked.	Confirmation message.
OR1321	Update lock on group unlocked.	Confirmation message.
OR1400	No keywords.	There are no keywords in the keyword table at this time.
OR1401	Keyword '<keyword>' added.	Confirmation message.
OR1402	Keyword '<keyword>' deleted.	Confirmation message.
OR1403	Keyword '<keyword>' dropped.	Confirmation message.

Code	Message	Explanation
OR1404	KEYWORD required.	Enter the keyword to be linked. It may not be blank.
OR1405	Keyword '<keyword>' linked to the topic.	Confirmation message.
OR1406	Keyword '<keyword>' linked to the note.	Confirmation message.
OR1407	No orphan keywords.	There are no orphaned keywords at this time.
OR1408	No keywords linked to the topic.	There are no keywords linked to the selected topic.
OR1409	No keywords linked to the note.	There are no keywords linked to the selected note.
OR1410	Search value(s) required.	For Keyword Search, at least one keyword to be searched for is required; for Title Search, at least one title string to be searched for is required.
OR1411	Search type invalid.	You entered an invalid search type.
OR1412	Please provide a valid date.	You entered an invalid date format. Valid date format is mm/dd/yy.
OR1413	More than <100> <topics/notes> satisfied search criteria. First <100> returned.	The search criteria you specified resulted in more than 100 topics or notes that satisfy the search criteria. The first 100 are displayed. You may edit and limit your search criteria for better search results.
OR1414	WARNING: Selection exceeds maximum search value. Press F3 or F6.	For Keyword Search, the keywords you selected from the Keyword List exceed allowed length for search value.
OR1415	WARNING: Search value truncated. Please edit the search value.	For Keyword Search, the search value has been truncated because the keywords you selected from the Keyword List exceed maximum length. Please check and edit your search value.
OR1416	Too many keywords selected. Press F3 to end.	You may only select up to 5 keywords.
OR1417	Please provide a phrase separator.	A phrase separator is required for specifying one search value from another.
OR1418	Too many search values. Maximum is <5>.	You have specified more than five search values. Please check and edit your search value and/or phrase separator.
OR1419	Search value has a keyword that is too long.	For Keyword Search, one of the keywords in the search value exceeds 32 characters.
OR1420	Please provide word(s) or phrase(s) to search for.	For Keyword Search, at least one keyword to be searched for is required; for Title Search, at least one title string to be searched for is required.
OR1421	Search type required.	A search type is required. Please check the search type selection.
OR1422	Type of search on notes is required.	Type of search on notes may not be blank. You may either search for notes that are attached on active topic only, or for all notes within the note group.
OR1423	<User> is not authorized to perform search.	You are not authorized to perform any kind of search. Please check with your User Administrator or System Administrator.
OR1424	Search type not available.	The search type you selected is not available due to lack of authorization. Please check with your User Administrator.

Code	Message	Explanation
OR1425	Match ANY or ALL words or phrases?	Please choose ANY or ALL. If you want search results to match on any of your search values, specify ANY, otherwise specify ALL.
OR1426	No <topics/notes> satisfying search criteria found.	Not topics or notes satisfy the specified search criteria.
OR1427	Either user or date or both required for Author/Date Search.	For Author/Date Search, please provide either user or date or both. At least one is required.
OR1428	Keyword selection cleared.	Your keyword selection has been cleared and reset.
OR1429	Field selection cleared.	Your field selection has been cleared and reset.
OR1432	No fields.	No fields in field table to update.
OR1433	Field '<field name>' deleted.	Confirmation message.
OR1434	Field '<field name>' added.	Confirmation message.
OR1435	Field '<field name>' is a duplicate.	Trying to add a field that already exists.
OR1436	Search PGM <pgmid> failed. OP=<opcode>, SQL=<SQL code>.	System problem. Please contact DBA Technical support!
OR1437	Search PGM <pgmid> Abended. Abend='<abcode>'.	System problem. Please contact DBA Technical support!
OR1438	Search date format/value is invalid.	Search date/time must be a valid date/time.
OR1439	Search Keyword '<keyword>' is not a valid Keyword.	The keyword entered is not a keyword in the OLR database.
OR1440	Search Group '<groupname>' is not a valid Group.	The group name provided is not a valid group in the OLR database.
OR1441	Search Userid '<userid>' is not a valid Userid.	The userid provided is not a valid userid in the OLR database.
OR1442	Search Pgm <pgrmid> failed. OP=<opcode>, Resp=<nnnn>.	System error. Please contact DBA Technical support.
OR1443	Search Topic '<topic title>' is not valid.	The search topic is not in the OLR database.
OR1500	<Userid> not registered. Please see your OLR administrator.	The user named in the message is not registered to the OLR System. The user is not covered by any generic user registration, and no PUBLIC access has been defined.
OR1501	<Userid> has not been assigned a default Group.	This user has not been assigned a default Group. Type the name of a Group at the command prompt and press ENTER to indicate which Group is to be accessed. To be assigned a default Group, consult the System Administrator or a User Administrator.
OR1502	<Userid> does not have access to topics in <groupname>.	This user has not been assigned access to topics in the Group named in the message. Consult the Group Administrator.
OR1503	<Userid> does not have access to notes in <Group>.	This user has not been assigned access to notes in the Group entered at the command line. Consult with the Group Administrator.
OR1504	Request denied: unable to determine user's authorization.	This user has not been assigned any type of access to any group within the system. The requested function cannot be performed.

Code	Message	Explanation
OR1505	Group <groupname> does not exist. See Group List.	Group not found. To display topics in a valid group, select a group from the Group List window.
OR1510	<Userid> not authorized to view <groupname> user list.	You may not look at the user list for the group in question.
OR1511	<Userid> not authorized to view user administrator list.	You are not authorized to look at the user administrator list.
OR1512	<Userid> not authorized to view <groupname> administrator list.	You are not authorized to look at the user list for the group in question.
OR1513	Please page to next topic: <user> not authorized to read this topic.	The active topic within the outline is read protected. Please page to the next or previous topic.
OR1514	<Userid> not authorized to read protected topics in <groupname>.	The topic you are trying to read is read-protected or belongs to a group that is read-protected. You are not set up to be able to read this topic. Consult with your Group Administrator.
OR1520	<Userid> not authorized to edit topics in <group>.	You are not allowed to change text for topics in this group. Consult with your Group Administrator.
OR1521	<Userid> not authorized to edit notes in <groupname>.	You are not allowed to change text for notes in this group. Consult with your Group Administrator.
OR1522	<Userid> not authorized to change topics in <group>.	You are not allowed to change the profile for topics in this group. Consult with your Group Administrator.
OR1523	Edit not allowed. <Userid> not author of topic.	You are not allowed to change text for topics that you did not create in this group. You can only change text for topics that you have created in this group. Consult with your Group Administrator.
OR1524	Edit not allowed. <Userid> not author of note.	You are not allowed to change text for notes that you did not create in this group. You can only change text for notes that you have created in this group. Consult with your Group Administrator.
OR1525	Update not allowed. <Userid> not author of topic.	You are not allowed to change the profile for topics that you did not create in this group. You can only change the profile for topics that you have created in this group. Consult with your Group Administrator.
OR1526	<Userid> not authorized to edit protected topics in <groupname>.	The topic you are trying to edit is read-protected or belongs to a group that is read-protected. You are not set up to be able to edit this topic. Consult with your Group Administrator.
OR1527	<Userid> not authorized to change outlines in <groupname>.	You are not allowed to build or change outlines for topics in this group. Consult with your Group Administrator.
OR1528	<Userid> not authorized to change help links for <groupname>.	You are not allowed to change help links using topics in this group. Consult with your Group Administrator.
OR1530	<Userid> not authorized to add notes in <groupname>.	You are not allowed to add notes in this group. Consult with your Group Administrator.
OR1531	<Userid> not authorized to add keywords in <group>.	You are not allowed to link keywords to topics or notes in this group. Consult with your Group Administrator.
OR1532	<Userid> not authorized to add groups	Authorization failure.
OR1533	<Userid> not authorized to add users.	Authorization failure

Code	Message	Explanation
OR1534	<Userid> not authorized to add user administrators.	Authorization failure
OR1535	<Userid> not authorized to users in <groupname>.	Authorization failure
OR1536	<Userid> not authorized to add administrators in <groupname>.	Authorization failure
OR1537	<Userid> not authorized to add topics.	You are not allowed to add topics in this group. Consult with your Group Administrator.
OR1538	<Userid> not authorized to add help links.	You are not allowed to build help links using topics in this group. Consult with your Group Administrator.
OR1540	<Userid> not authorized to delete topics in <groupname>.	You are not allowed to delete topics from this group. Consult with your Group Administrator.
OR1541	<Userid> not authorized to delete notes in <groupname>.	You are not allowed to delete notes from this group. Consult with your Group Administrator.
OR1542	<Userid> not authorized to delete help links for <groupname> topics.	You are not allowed to delete help links using topics in this group. Consult with your Group Administrator.
OR1543	<Userid> not authorized to delete groups.	Authorization failure
OR1544	<Userid> not authorized to delete the private group <groupname>.	Authorization failure
OR1545	<Userid> not authorized to delete users.	Authorization failure
OR1546	<Userid> not authorized to unlock update locks in <groupname>.	You are not authorized to release update locks for topics or notes in this group.
OR1600	Table <table-id> new copied.	The system table has been new copied to the CICS region.
OR1601	New copy failed, DBXANCHR deadlock. Try again.	Attempt to new copy the system table failed because the OLR System cannot access the OLR Anchor table which synchronizes all OLR system tables. Please try again later.
OR1602	<Table-id> cannot be new copied; table is not loaded.	Attempt to new copy the system table failed because the table has not been loaded.
OR1603	Table <table-id> loaded.	The system table has been loaded into CICS storage.
OR1604	Table <table-id> was already loaded.	Information message.
OR1605	<Newcopy> not allowed for <table-id> table.	This table may not be new copied. It must remain permanently resident.
OR1606	Table '<table-id>' cannot be new copied. Resp = '<response-code>'.	Attempt to new copy the system table failed due to system error indicated by the response code. Contact DBA Technical Support.
OR1607	Sysparms Table new copied. You may exit and start a new session.	The OLR System Parameters Table has been new copied to your CICS region. Exit and start a new OLR session to pick up any changes made to system settings.
OR2000	Print request processed. Output will be sent to destination <destination-ID>.	Your print request has been processed. The print output with a banner page will be printed in this destination.
OR2001	Print selection invalid.	The print selection you have made is invalid or is not available.

Code	Message	Explanation
OR2002	Print selection options not available. Press F3 to end.	If you are printing topics, all print selections may not be available if the topic has no text nor subtopics.
OR2003	Unknown print error <error-id>.	System error. Please contact DBA Technical Support.
OR2004	Carriage control required for DJDE printing.	Carriage Control needs to be set to 'Y' if you choose to print using the DJDE option.
OR2005	Print lines per page invalid.	The number you typed for lines per page is too big. Maximum is 99.
OR2006	Printer page width invalid.	The printer page width you supplied was invalid.
OR2007	Print outline break level invalid.	The page break level should be non-zero.
OR2008	Print Destination ID invalid or not found.	The destination ID you typed is not valid or is not available. Consult with your System Administrator for a list of available destination IDs.
OR2009	Print type invalid.	Print type must be CICS or SPOOL.
OR2010	Print Destination ID required.	Enter a printer or destination ID for the print output to be sent to.
OR2011	Print selection required.	Enter your print selection in the SELECTION field.
OR2012	Install error - Print Driver <tranid> defined as Local in AOR.	Installation problem. The Print Driver transaction needs to be defined local to the terminal owning region.
OR2100	Form load failed, reason code <reason>, Fld = '<Field name>'.	System error. Contact DBA Technical support.
OR2102	Form field <field name> could not be found.	The field referenced in a form could not be found. This occurred during form load.
OR2103	Form field <field name> load failed, SQLCODE = <SQL code>.	System error. Contact DBA technical support. Error noted during form load.
OR2104	Form contains too many Fields, Max = <nnnn>.	The form could not be loaded because it contained more fields than allowed.
OR2105	Form Value Queue TS error, QID=<queueid>, RESP=<nnnn>.	System error - contact DBA Technical support.
OR2106	Form Field is too long, Field=<field name>.	During form load, the field in question could not be processed because it will overflow the right margin of the form.
OR2107	Form '<form name>' loaded. Please complete.	Informational message. Form has been loaded. Please fill it out.
OR2109	DB2 problem, SQLCODE=<SQL code>.	System error. Please contact DBA Technical support.
OR2111	Form Field is Invalid, re-enter value.	Cursor points at invalid form field value. It was invalidated by a user-supplied form field edit program.
OR2112	Form Field is Invalid: <user message>.	Cursor points at invalid form field value, and message reflects message returned by user-supplied field value edit program.
OR2113	Form incomplete, SAVE declined.	Form may not be saved until all required fields have been entered.

Code	Message	Explanation
OR2114	OLR System Variable '<variable name>' not found, Form load failed.	During form load, a field with a name beginning "OR" was encountered. The field was not a valid OLR system variable.
OR2115	Fld table <field name> failure, Rsn=<nnnn>, Resp=<nnnn>, SQL=<SQL code>.	System error. Please contact DBA Technical support.
OR8000	Please make a selection.	Informational message.
OR8001	End of selections reached.	You have paged to the end of the list of selections. PF8 is no longer active.
OR8002	Beginning of selections reached.	You have paged to the beginning of the list of selections. PF7 is no longer active.
OR8003	Selection required.	The function you have requested cannot be performed without a selection.
OR8004	Please choose an option.	Informational.
OR8005	'<Entry>' is not an option.	The option you entered is invalid. Please select one of the available options.
OR8006	Option not currently available.	The option you selected is not currently available. Please select one of the available options.
OR8100	Invalid action.	The command you entered in the ACT column is not valid.
OR8101	Maximum actions currently pending.	The maximum of 15 pending actions has been exceeded. No actions are performed if some actions are pending. Resolve pending actions, or type RESET at the ==> and press enter to remove all pending actions.
OR8102	Action pending: only one COPY or MOVE at a time.	You have typed more than one move or copy command into the ACT column. Please complete one copy or move function before requesting another.
OR8103	AFTER pending: only one AFTER at a time.	You have typed more than one [A] in the action column. Please remove the extra commands.
OR8104	Request invalid: action(s) pending.	You have requested a function that cannot be performed until pending actions have been resolved. Resolve pending actions, or type RESET at the ==> and press enter to remove all pending actions.
OR8105	Action overlaps following action.	You have typed commands which overlap. Please remove the extra commands.
OR8106	Action overlapped by preceding delete.	You have typed an action command on a line which you are deleting. Please remove this command.
OR8107	Only one COPY or MOVE allowed. Only one AFTER allowed.	You have typed more than one move or copy command. Please complete one copy or move function before requesting another.
OR8108	Action invalid: no topic is currently marked.	The requested function cannot be performed without a marked topic.
OR8109	Action invalid: no subtopics at or beyond this line.	The command you typed in the ACT column is not valid on a blank line.

Code	Message	Explanation
OR8110	Action invalid: insert marked topic valid at line 1.	The Insert Bookmark [IB] command can only be entered on the first line of the outline. Use Bookmark Before [BB] and Bookmark After [BA] to insert marked topics on other lines.
OR8111	Action(s) pending.	You have typed commands in the ACT column which are still pending. Please complete the commands or type RESET at the ==> and press ENTER to remove the pending commands.
OR8200	OLR System terminated at user request.	Your OnLine Reference session has ended normally.
OR8201	Save performed.	Your changes have been saved.
OR8202	Undo performed.	Your display has been reset to the last 'saved' version.
OR8203	Terminal case shifted to <UPPER/UpLow>.	Your terminal setting has been changed to the mode indicated in the message.
OR8204	Invalid request; COPY, MOVE, and/or AFTER pending.	You must complete your 'copy' or 'move' commands before the requested function can be performed. Complete the commands or type RESET at the command (==>) and press ENTER to remove the pending commands.
OR8205	<Topic/Outline/Help Link> not updated: no changes were made.	Update was requested, but no changes had been made..
OR8206	<Title/Text> contains lower case. Terminal case shifted to UpLow.	You have entered into update mode on a topic whose title or text contains lower case characters. Your terminal has been shifted to UpLow so that the existing lower case data will not be changed to upper case.
OR8207	Qualifiers hidden.	The qualifiers for the titles on this screen are no longer displayed. Use the SHOWQUAL command to see them.
OR8208	Qualifiers displayed.	The qualifiers for the titles on this screen are displayed. Use the HIDEQUAL command to hide them.
OR8209	WARNING: <Title/Text> contains lower case. Terminal case is UPPER.	The topic title or text on your screen contains lowercase characters but your terminal is in UPPER case mode. Changing the topic or text at this time will result in data being loaded onto the database in upper case.
OR8210	Topic '<title:qualifier>' marked.	The topic in the message has been marked.
OR8211	Topic '<title:qualifier>' unmarked.	The topic in the message has been unmarked.
OR8300	<PF Key> is not active.	The function key you pressed is not active for this display.
OR8301	'<Entry>' is not a command.	The value entered at the command prompt is not a recognizable command.
OR8302	Help is not currently available.	The HELP system is not active. Contact your OLR System Administrator to activate HELP.
OR8304	Exceptional condition encountered. END or EXIT required.	The OLR System has been unable to perform database activity required for this display. The exact nature of the problem was identified in the message prior to this one. This display is disabled due to the error encountered. Other OLR System displays may not have been affected.
OR8305	Exceptional condition encountered. Function not currently available	Previous errors preclude doing any further processing. You must exit.

Code	Message	Explanation
OR8306	'MARK' is required before a switch can be performed.	You have typed a SWITCH command, but no topic has been marked. You must mark a topic before you can switch.
OR8307	Function not currently available.	Informational message.
OR8308	Exceptional condition encountered. No editing allowed.	The edit function has been disabled due to the reason detailed in the previous message.
OR8309	<Object> not available for update. Try again later.	The selected object is currently being updated by another user. Please try again later. If the update lock has not been released on an object, an authorized administrator can use the UNLOCK command to release the stranded update lock. A Group Administrator can use this command for topics, notes, help links and group profiles. A User Administrator can release update locks on user profiles.
OR8310	Lock Table full. Try again later.	The level of update activity on the system is higher than anticipated. Please notify your OLR System Administrator, and try again later.
OR8311	USERID not supplied: update not allowed.	Your USERID is not registered in the OLR System, or you have not signed on to CICS using your userid.
OR8312	'MARK' invalid without an active topic.	There is no active topic in the current display. MARK cannot be performed without an active topic.
OR8313	Function unavailable: no active topic.	There is no active topic in the current display. The function you requested cannot be performed without an active topic.
OR8314	Change function disabled in System Parameters.	When your system was installed, the UPPER and UpLow command functions were disabled.
OR8315	Case Change function disabled. Possible installation problem.	The UPPER and UpLow commands are disabled due to a possible installation problem. Consult with the installer of the OLR System.
OR8316	'<Entry>' is not an active command.	The command you entered is valid but cannot be performed from the current display.
OR8317	Locking system FATAL error, reason = '<response-code>'.	A fatal error has occurred, as indicated by reason code, in the OLR locking system. Contact DBA Technical Support.
OR8318	START '<transid>' in PGM <program-name> failed, RESP = '<response-code>'.	A failure occurred when starting the transaction in the specified program due to a system error as indicated by the response code. Contact DBA Technical Support.
OR8319	LINK '<program-name>' in PGM <program-name> failed, RESP = '<response-code>'.	A failure occurred when linking to a program from the specified originating program due to a system error as indicated by the response code. Contact DBA Technical Support.
OR8400	Must be '<Y>' OR '<N>'.	Type 'Y' (yes) or 'N' (no) for the highlighted field.
OR8401	Group not found.	The group you typed is not found in the database.
OR8500	Application ID required.	The APPL field may not be blank if a SCREEN has been provided.
OR8501	Screen ID required for field help.	The SCREEN field may not be blank if ROW and COLUMN information has been provided.

Code	Message	Explanation
OR8502	ROW must be a value between 1 and 43.	You have entered an invalid row number. Valid row numbers are between 1 and 43.
OR8503	COLUMN must be a value between 1 and 132.	You have entered an invalid column number. Valid column numbers are between 1 and 132.
OR8504	LENGTH must be a value between 1 and 132.	You have entered an invalid field length. Valid lengths are between 1 and 132.
OR8505	Specify a topic, use marked topic, or provide a Base Help Link.	Please type a title, mark a topic, or provide a Base Help Link information before proceeding.
OR8506	'Marked Topic' cannot be used if no topic is marked.	Please type a topic title or mark a topic before proceeding.
OR8507	'Marked Topic' cannot be used if topic has been provided.	You have both provided a topic title and indicated that the Marked Topic should be used. Either clear the topic fields, or set 'Use Marked Topic' to 'N', depending upon the desired outcome.
OR8508	ROW, COLUMN and LENGTH required for field help.	If you are defining and adding a Field Level Help Link, you must enter values for the Row, Column and Length fields.
OR8509	LEVEL must be a number greater than zero.	You have specified a level that is not a positive number. The level can be a value between 1 and 5.
OR8510	Both ROW and COLUMN required for window position.	You must enter values for both the Window Row and Window Column fields to set the window position.
OR8511	Requested function not available from extended help.	The function you requested is not available from Extended Help, but is available from the First-level Help Link.
OR8512	'Marked Help Link' cannot be used if no help link is marked.	To use a Marked Help Link, you need to mark a help link from the Select Help Link screen.
OR8513	'Marked Help Link' cannot be used if Base Help Link provided.	If you entered information on the Base Application, Screen, Row and Column fields (to identify the Base Help Link), you cannot use a Marked Help Link. Either clear the Base Help Link fields, or set 'Use Marked Help Link' to 'N', depending on the desired outcome.
OR9000	Table 'DBXANCHR' in use and cannot be accessed.	The Anchor table is currently locked for a newcopy request at another terminal. Try later.
OR9001	Table '<table name>' cannot be loaded. Resp='<nnnn>'.	The name OLR table cannot be loaded. Possible installation problem.
OR9002	Table '<table name>' ENQ failed. Resp='<nnnn>'.	System error. Please contact DBA Technical support.
OR9003	Table '<table name>' Undefined in Anchor.	The Anchor table does not contain the table name in question. Probable install problem.
OR9004	Table '<table name>' not defined in '<OLR literal table name>'.	The current OLR literal table does not contain a data block for the given table name. Contact DBA Technical support.
OR9100	Sysparm table could not be addressed.	Internal error. Contact DBA Technical support.
OR9101	'<program>' Abended, '<abend code>' was ABCODE.	This program was abended while accessing OLR Database. ABCODE is the abend code.
OR9500	Authorization expired. Contact DBA Inc. for authorization code.	Your trial EXPDT is invalid, or has expired. Please contact DBA Software for a new code.

Code	Message	Explanation
OR9501	Call DBA Inc. Pswd = <pppp>, Opts = <oooo>, Expd = <yyddd>, CPU = <nnnn>.	Your trial authorization code is invalid, or has expired. Please contact DBA Software for an authorization code.
OR9502	Invalid OLR System entry.	OLR System cannot be entered using the TRANID you typed.
OR9503	OLR System Error <error-code> in program <program-name>.	An unexpected error has occurred. Please call DBA Inc. and provide the information in the message to Technical Support.
OR9504	Restoration Failure --- terminal does not support ATI.	OLR intercept may not restore on a terminal that does not support ATI.
OR9505	OLR System Error <error-code> in program <program-name>. CICS Resp = <response-code>.	A system error has occurred in the specified program as indicated by the system error code and CICS response code. Contact DBA Technical Support.
OR9506	OLR Control table full, further navigation inhibited.	System problem, please contact DBA Technical support.
OR9507	Call DBA Inc. Pswd=<pppp>, Opts=<oooo>, CPU ID=<nnnn>.	There is a problem with your License password and authorization for OLR cannot be granted.
OR9998	OLR System terminated. Unspecified error.	An unexpected error has occurred. Please call DBA Inc. Technical Support.
OR9999	Unspecified error.	An unexpected error has occurred. Please call DBA Inc. Technical Support.

Chapter 4 OLR Server Messages

This chapter contains the OLR Server Messages, whose assigned prefix is TS.

The messages are listed by number and a brief explanation is provided for each.

Code	Message	Explanation
TS2001	No topics found.	No topics match the criteria provided.
TS2002	More topics to retrieve.	You can scroll forward to see more topics.
TS2003	Warning: first page returned.	You have scrolled back to the start of the topic list.
TS2004	Warning: last topic returned.	You have scrolled forward to the end of the topic list.
TS2011	No topics found.	No topics match the criteria provided.
TS2012	More topics to retrieve.	You can scroll forward to see more topics.
TS2013	Warning: first page returned.	You have scrolled back to the start of the topic list.
TS2014	Warning: last topic returned.	You have scrolled forward to the end of the topic list.
TS2021	No topics found.	No topics match the criteria provided.
TS2022	More topics to retrieve.	You can scroll forward to see more topics.
TS2023	Warning: first page returned.	You have scrolled back to the start of the topic list.
TS2024	Warning: last topic returned.	You have scrolled forward to the end of the topic list.
TS2031	No topics found.	No topics match the criteria provided.
TS2032	More topics to retrieve.	You can scroll forward to see more topics.
TS2033	Requested group not found.	No group has the name you provided.
TS2034	Group required.	You must provide a group name.
TS2041	No topics found.	No topics match the criteria provided.
TS2042	More topics to retrieve.	You can scroll forward to see more topics.
TS2043	User required.	You must provide a user id.
TS2044	Requested group not found.	The group name you provided is not found on the server.
TS2045	Group required.	You must provide a group name.
TS2101	Topic not found.	No topic matches the name you provided.
TS2102	Referential integrity error: 'Alias of' topic not found.	An error has occurred in the database. Contact DBA Software.
TS2111	Topic not found.	No topic matches the name you provided.
TS2121	At least one requested topic was not found.	One of more of the topics you requested were not found on the server.
TS2131	Notepad topic not found.	No notepad topic was found for the notepad key you provided.
TS2132	User not registered.	The user name you specified is not registered on the server.
TS2141	Linked topic not found.	An error has occurred in the database. Contact DBA Software.
TS2142	More text to retrieve.	There is more text available for this topic.
TS2201	Topic not found.	The topic you specified is not found on the server.
TS2202	'Alias of' topic not found.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of could not be found in the database.

Code	Message	Explanation
TS2203	Group not found.	The Group provided in a Change Profile request does not exist.
TS2204	Topic Title required.	Please provide a topic title.
TS2205	Group required.	Please provide a group.
TS2206	Read Protect must be 'Y' or 'N'.	A value other than 'Y' or 'N' was provided with the READ PROTECT keywords.
TS2207	Owner Restrict must be 'Y' or 'N'.	A value other than 'Y' or 'N' was provided with the OWNER RESTRICT keywords.
TS2208	Private Text must be 'Y' or 'N'.	A value other than 'Y' or 'N' was provided with the PRIVATE TEXT keywords.
TS2209	Update user required.	Please provide the user id of a registered user with update rights.
TS220A	Invalid Book Type.	This request uses an invalid book type value.
TS220B	Private Text invalid when topic is an alias.	An attempt was made to set PRIVATE TEXT to 'Y'. This is not allowed when the topic is an alias.
TS220C	Requested 'Alias of' topic has private text.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of has private text. Topics that have private text cannot have aliases.
TS220D	Requested 'Alias of' topic in restricted group.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of is in an alias restricted Group. Topics in alias restricted Groups cannot have aliases outside their Group.
TS220E	Requested 'Alias of' topic is an alias.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of is itself an alias. Topics that are aliases cannot have aliases.
TS220F	A topic with the requested title already exists.	An attempt was made to rename an existing topic, but there is already a topic in the database with the requested new "title/qualifier" combination.
TS220G	A topic that has aliases cannot be an alias.	An attempt was made to make a topic into the alias of another topic. A topic cannot be made into an alias if it is the base topic for other alias topics.
TS220H	A subtopic may not be designated a book.	An attempt was made to set BOOK to 'Y' for the specified topic. A topic that is a Book can't be a Subtopic, conversely a topic that is already a Subtopic cannot be designated a Book.
TS220I	A topic may not be an alias of itself.	An attempt was made to make a topic into an alias of itself. This is not allowed.
TS220J	Concurrency Restrict must be 'Y' or 'N'	Please enter a valid value.
TS220K	<User> is not authorized to update topics in <Group>.	The user who attempted to update the topic is not authorized to do so in the topic's group. Consult the Group Administrator.
TS220L	Unique qualifier not generated. Please try again.	The OLR/Server has failed to generate a unique qualifier for the duplicate topic you are changing. Please try again.
TS220M	Form indicator must be 'Y' or 'N'.	Please enter a valid value.

Code	Message	Explanation
TS2301	Topic already exists.	A topic with the title and qualifier provided already exists in the database. You may need to add a qualifier, if the topic doesn't already have one, to differentiate it from other topics with the same title.
TS2302	'Alias of' topic not found.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of could not be found in the database.
TS2303	Group not found.	The Group provided in an add topic request does not exist.
TS2304	Topic Title required.	A title must be provided when adding a topic to the database.
TS2305	Group required.	Provide the name of the Group into which the topic is to be added.
TS2306	Read Protect must be 'Y' or 'N'.	A value other than 'Y' or 'N' was provided with the READ PROTECT keywords.
TS2307	Owner Restrict must be 'Y' or 'N'.	A value other than 'Y' or 'N' was provided with the OWNER RESTRICT keywords.
TS2308	Private Text must be 'Y' or 'N'.	A value other than 'Y' or 'N' was provided with the PRIVATE TEXT keywords.
TS2309	Add user required.	Please enter the id of a user with update rights.
TS230A	Invalid Entry Point Type.	This request specifies an invalid value for entry point type.
TS230B	Private Text invalid when topic is an alias.	An attempt was made to set PRIVATE TEXT to 'Y'. This is not allowed when the topic is an alias.
TS230C	Requested 'Alias of' topic has private text.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of has private text. Topics that have private text cannot have aliases.
TS230D	Requested 'Alias of' topic in restricted group.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of is in an alias restricted Group. Topics in alias restricted Groups cannot have aliases outside their Group.
TS230E	Requested 'Alias of' topic is an alias.	An attempt was made to make a topic into the alias of another topic, but the topic it was to be made an alias of is itself an alias. Topics that are aliases cannot have aliases.
TS230F	A topic may not be an alias of itself.	An attempt was made to make a topic into an alias of itself. This is not allowed.
TS230G	Concurrency Restrict must be 'Y' or 'N'.	Please enter a valid value.
TS230H	<User> is not authorized to add topics to <Group>.	The user who attempted to add the topic does not have authority to do so in the Group specified. Consult the Group Administrator.
TS230I	Unique qualifier not generated. Please try again.	The OLR/Server has failed to generate a unique qualifier for the duplicate topic you are trying to add. Please try again.
TS230J	Form indicator must be 'Y' or 'N'.	Please enter a valid value.
TS2401	Topic not found.	The topic you requested is not found on the server.

Code	Message	Explanation
TS2402	Delete not allowed. Topic has aliases.	An attempt was made to delete a topic that has aliases. Alias relationships must be removed before a topic can be deleted. Topics that are aliases of the topic must be changed so that they are no longer aliases of the topic before deletion will be allowed.
TS2403	Delete not allowed. Topic has concurrent references.	An attempt was made to delete a topic that has external links. HELP Links that refer to this topic must be changed so that they no longer refer to this topic before deletion will be allowed.
TS2404	<User> is not authorized to delete topics from <Group>.	The user who attempted to delete the topic does not have the authority to do so in the topic's Group. Consult the Group Administrator.
TS2405	Update user required.	Please provide the id of a user with update rights.
TS2406	Delete not allowed. Topic has protected notes.	You cannot delete a topic that has notes that are delete-protected. You need to check these notes and unprotect them to be able to delete the topic.
TS2501	No topics found.	No topics match the criteria you provided.
TS2502	More topics to retrieve.	You may scroll forward to see more topics.
TS2503	Keyword(s) not defined.	For Keyword Search, at least one keyword specified does not exist.
TS2541	No topics found.	No topics match the criteria you provided.
TS2542	More topics to retrieve.	You may scroll forward to see more topics.
TS2543	There should be at least 1 but not more than 5 title strings.	This search request has an invalid number of title strings.
TS2581	No topics found.	No topics match the criteria you provided.
TS2582	More topics to retrieve.	You may scroll forward to see more topics.
TS3001	No text found.	This topic has no text.
TS3002	More text to retrieve.	You may scroll forward to see additional text for this topic.
TS3003	Referential integrity error: Note topic not found.	This is an internal database error. Please contact DBA Software.
TS3201	Topic not found.	The topic you requested is not on the server.
TS3202	Starting Line Sequence must be a value between zero and 32767.	Please resubmit this request with a valid line sequence number.
TS3203	Update user required.	Please specify the user id of a user with update rights.
TS3204	Line Size must be a value between 1 and 72.	The value provided with the LNSZ keyword was out of range. It must be a number between 1 and 72.
TS3205	Page Size must be a value between 1 and 18.	The value provided with the PGSZ keyword was out of range. It must be a number between 1 and 15.
TS3206	Display Break must be 'Y' or 'N'	Please correct the display break setting.
TS3207	Paragraph Break must be 'P' or 'T' or 'N'	Please correct the paragraph break setting.
TS3208	Highlight must be 'Y' or 'N'	Please correct the highlight setting.

Code	Message	Explanation
TS3209	A topic that is an alias may not have text.	An attempt was made to add text for a topic that is the alias of another topic. Since aliases share the text of their base topic, they may not have text of their own.
TS320A	Topic already has text.	An attempt was made to add text for a topic that already has text.
TS320B	Text not found.	An a attempt was made to modify the text of a topic that doesn't have any text.
TS320C	Text update continuation error: active copy not found.	An internal database error has been encountered in the course of attempting to update text. Contact your OLR System Administrator.
TS320D	Text update continuation sequence error.	An internal database error has been encountered in the course of attempting to update text. Contact your OLR System Administrator.
TS320E	Note not found.	The note you specify is not found on the server.
TS320F	Text line(s) of more than <nn> characters were truncated.	At least one of the text lines provided with edit request was longer than the line size specified. Text lines that exceeded the given line size were truncated.
TS320G	<User> is not authorized to edit topics in <Group>.	The user who attempted to edit the topic's text does not have authority to do so in this topic's Group. Consult the Group Administrator.
TS320H	<User> is not authorized to edit notes in <Group>.	The user who attempted to edit the note's text does not have authority to do so in this note's Group. Consult the Group Administrator.
TS320I	WARNING: Text line(s) beyond system limit truncated.	The number of lines for your text has exceeded the system limit. Text lines beyond the system limit cannot be displayed. Consult with your System Administrator.
TS3401	Text not found.	The text you requested is not found on the server.
TS3402	<User> is not authorized to delete text for <Group> notes.	The user who attempted to delete the note's text does not have authority to do so in this note's Group. Consult the Group Administrator.
TS3403	<User> is not authorized to delete text for <Group> topics.	The user who attempted to delete the topic's text does not have authority to do so in this topic's Group. Consult the Group Administrator.
TS3404	Update user required.	Please specify the id of a user with update rights.
TS3501	FIND string not found.	The string you specified is not found in the text.
TS3502	At least one topic could not be found.	One or more of the requested topics was not found.
TS4001	No subtopics found.	This topic has no subtopics.
TS4002	More subtopics to retrieve.	You can scroll forward to see more topics.
TS4201	Topic not found.	The requested topic was not found on the server.
TS4202	Starting Sequence must be greater than zero.	Please correct the starting sequence setting.
TS4203	Topic already has subtopics.	The topic you are adding an outline to already has subtopics.

Code	Message	Explanation
TS4204	A topic may not be a subtopic of itself.	The topic you are trying to define subtopics for appears in the list of subtopics you are trying to define. This is not allowed.
TS4205	A requested subtopic not found.	A topic identified for use as a subtopic could not be found in the database. Make sure your spelling is correct and that a qualifier was provided if needed.
TS4206	A requested subtopic is owner restricted.	A topic identified for use as a subtopic can only be used in outlines within its Group. You are trying to make it the subtopic of a topic that is not in the same Group.
TS4207	A requested subtopic is in a restricted group.	A topic identified for use as a subtopic is in a Group that is owner restricted. Topics in owner restricted Groups can only be used in outlines within their Group. You are trying to make it the subtopic of a topic that is not in the same Group.
TS4209	Subtopic Add User required if Subtopic Add Time/Date provided.	Please specify the id of a user with update rights.
TS420A	Update user required.	Please specify the id of a user with update rights.
TS420B	<User> is not authorized to change outlines in <Group>.	The active user does not have the rights to change outlines in the specified group.
TS4401	Topic not found.	The topic you requested is not found on the server.
TS4402	<User> is not authorized to change outlines in <Group>.	The user who attempted to drop the topic's subtopics does not have authority to do so in this topic's Group. Consult the Group Administrator.
TS4403	Update user required.	Please specify the id of a user with update rights.
TS4801	No outline found.	There is no outline for this topic.
TS4802	More topics in outline.	You may scroll forward to see more topics.
TS4803	Only one topic may be provided when 'begin' requested.	Please correct this request.
TS4804	Rebuild level must be greater than zero when rebuild requested.	Please correct this request.
TS4805	Rebuild level may not be less than request record count.	Please correct this request.
TS4806	Outline concurrency error - request topic not found.	The topic you requested is not found on the server.
TS5001	No help links found.	No help links were found for the criteria you provided.
TS5002	More help links to retrieve.	You may scroll forward to list more help links.
TS5003	Warning: first page returned.	You have scrolled to the start of the list of help links.
TS5004	Warning: last help link returned.	You have scrolled to the end of the list of help links.
TS5005	Referential integrity error: base help link not found.	This is a database error. Please contact DBA Software.
TS5011	No help links found.	No help links were found for the criteria you provided.
TS5012	More help links to retrieve.	You may scroll forward to list more help links.
TS5013	Warning: first page returned.	You have scrolled to the start of the list of help links.

Code	Message	Explanation
TS5014	Warning: last help link returned.	You have scrolled to the end of the list of help links.
TS5021	No help links found.	No help links were found for the criteria you provided.
TS5022	More help links to retrieve.	You may scroll forward to list more help links.
TS5023	Application Id required.	Please correct this request.
TS5041	No help links found.	No help links were found for the criteria you provided.
TS5042	More help links to retrieve.	You may scroll forward to list more help links.
TS5043	Requested topic not found.	There is no topic on the server matching this criteria.
TS5051	No help links found.	No help links were found for the criteria you provided.
TS5052	More help links to retrieve.	You may scroll forward to list more help links.
TS5053	Application Id required.	Please correct this request.
TS5101	Help link not found.	The requested Help Link could not be found in the database.
TS5102	Referential integrity error: base help link not found.	An internal database error has been encountered. The definition for the Help Link being retrieved indicates that it uses a Base Help Link, but the Base Help Link it refers to could not be found in the database. Contact your OLR System Administrator.
TS5103	Referential integrity error: help topic not found.	An internal database error has been encountered. The definition for the Help Link being retrieved indicates that it is linked to a topic, but the topic it refers to could not be found in the database. Contact your OLR System Administrator.
TS5111	Help topic not found.	There is no topic on the server with the criteria you provided.
TS5112	Referential integrity error: help topic not found.	An internal database error has been encountered. The definition for the Help Link being retrieved indicates that it is linked to a topic, but the topic it refers to could not be found in the database. Contact your OLR System Administrator.
TS5113	More text to retrieve.	You can scroll forward to see more text for this topic.
TS5114	User not registered.	The user is not registered on this server.
TS5201	Help Link not found.	There is no help link for this location.
TS5202	Application ID required.	Please provide an application id for this request.
TS5203	Row must be a value between zero and <n>.	Please correct the row specification.
TS5204	Column must be a value between zero and <n>.	Please correct the column specification.
TS5205	Length must be a value between zero and <132>.	The length value provided was not numeric, or it was out of range.
TS5206	Topic Title required for Extended Help.	Extended Help (levels 2 through 5) may not refer to a Base Help Link -- it must be linked to a Topic.
TS5207	Update User required.	Please provide the id of a User with update rights.

Code	Message	Explanation
TS5208	Screen ID required for field help.	Please provide a screen ID.
TS5209	Row, Column and Length required for field help.	Please provide the row, column and length.
TS520A	Topic Title or a Base Help Link required, but not both.	A Help Link can be linked to a topic, or it can refer to a Base Help Link. You have indicated both options. Remove either the topic or the Base Help Link from your request.
TS520B	A help link with the requested key already exists.	A Help Link has already been defined for the Application ID, Screen ID, row, column and level specified.
TS520C	Field range overlaps existing field.	The field range (for the row indicated, starting with the column indicated, extending through the length indicated) provided for the Help Link being defined overlaps the field range of an existing Help Link.
TS520D	Requested topic not found.	The topic to be used as the Help Topic for the Help Link could not be found in the database. Make sure your spelling is correct and that a qualifier was provided if needed
TS520E	Requested topic not available for use with help links.	The topic you specified cannot be used as a help topic.
TS520F	Help Level must be a value between 1 and <5>.	A help level value that is out of the range has been entered. Valid values are from 1 to 5.
TS520G	First Level Help may not be changed to Extended Help.	The level for a Help Link that was originally defined as Level '1' cannot be changed. If you want to the Help Link as extended help, you will have to delete it first, and re-add it with a help level between 2 and 5.
TS520H	Extended Help may not be changed to First Level Help.	An Extended Help Link, i.e. a help link whose help level value is between 2 and 5, cannot be a first level help link. The help level value cannot be changed to 1. If you want to use this Extended Help as a first level help, you will have to delete it first, and re-add it as a first-level help.
TS520I	Help Location may not be changed for Extended Help.	Extended Help is associated with a first-level Help Link for a field. If the field location (Application ID, Screen ID, row and/or column) has changed, make the changes to the first-level Help Link location. The changes you make will be reflected in the associated Extended Help Link(s).
TS520J	Only First Level Help can refer to a Base Help Link.	Extended Help (levels 2 through 5) cannot refer to a Base Help Link -- it must be linked to a Topic.
TS520K	Only Field Help can have Extended Help.	Extended Help (levels 2 through 5) can only be defined for field-level Help Links.
TS520L	Window Position (if provided) requires both Row and Column.	A window row has been provided without a window column, or a window column has been provided without a window row. Both are required to override the default window position.
TS520M	A Help Link cannot be based on itself.	A Help Link cannot use itself as a Base Help Link.
TS520N	Requested Base Help Link not found.	The Help Link identified for use as a Base Help Link could not be found in the database. Make sure the Application, Screen, Row and Column values are accurate.

Code	Message	Explanation
TS520O	Requested Base Help Link not available - it uses a Base Help Link.	A Help Link that uses a Base Help Link cannot be used as a Base Help Link itself.
TS520P	Help Link cannot use a Base Help Link - Extended Help exists.	This Help Link has its own Extended Help. If you would like it to refer to a Base Help Link, first delete the associated Extended Help Links. When a Help Link refers to a Base Help Link, it 'shares' the Extended Help of the Base Help Link.
TS520Q	Help Link cannot be changed from Field Level - Extended Help exists.	The Help Link cannot be changed to screen or application level because it has associated Extended Help Links. Screen and application level Help Links cannot have Extended Help.
TS520R	<User> is not authorized to define help links for <Group> topics.	The user who attempted to change the Help Link is not authorized to do so in the associated Help Topic's Group. Consult the Group Administrator.
TS520S	Referential integrity error: Base Help Link not found.	An internal database error has been encountered. The definition for the Help Link to be modified indicates that it uses a Base Help Link, but the Base Help Link it refers to could not be found in the database. Contact your OLR System Administrator.
TS520T	Help Link is already used as a Base Help Link.	The Help Link that is already currently being used as a Base Help Link cannot be changed to also use a Base Help Link.
TS5301	Help Link already exists.	A Help Link with the location you provided (Application ID, Screen ID, row, column and level) already exists in the database.
TS5302	Application ID required.	An APPLID must always be provided when a help location is defined.
TS5303	Row must be a value between zero and <43>.	The row value provided not numeric, or it was out of range.
TS5304	Column must be a value between zero and <132>.	The column value provided was not numeric, or it was out of range.
TS5305	Length must be a value between zero and <132>.	The length value provided was not numeric, or it was out of range.
TS5306	Topic Title required for Extended Help.	Extended Help (levels 2 through 5) may not refer to a Base Help Link -- it must be linked to a Topic.
TS5307	Update User required.	Please specify the id of a user with update rights.
TS5308	Screen ID required for field help.	A row, column and/or length was provided, but no Screen ID. Screen ID is required when defining field level help. Row, column and length are not valid unless field level help is being defined.
TS5309	Row, Column and Length required for field help.	If field level help is being defined, row, column and length are all required. For application or screen level help, row, column and length are invalid. The request provided at least one but not all of these values.
TS530A	Topic Title or a Base Help Link required, but not both.	A Help Link can be linked to a topic, or it can refer to a Base Help Link. You have indicated both options. Remove either the topic or the Base Help Link from your request.

Code	Message	Explanation
TS530B	Requested field overlaps range of existing field.	The field range (for the row indicated, starting with the column indicated, extending through the length indicated) provided for the Help Link being defined overlaps the field range of an existing Help Link.
TS530C	Requested Topic not found.	The topic to be used as the Help Topic for the Help Link could not be found in the database. Make sure your spelling is correct and that a qualifier was provided if needed
TS530D	Requested Topic not available for use with Help Links.	The topic you specified cannot be used as a help topic.
TS530E	Help Level must be a value between 1 and <5>.	A help level value that is out of the range has been entered. Valid values are from 1 to 5.
TS530F	Only First Level Help can refer to a Base Help Link.	Extended Help (levels 2 through 5) cannot refer to a Base Help Link -- it must be linked to a Topic.
TS530G	Only Field Help can have Extended Help.	Extended Help (levels 2 through 5) can only be defined for field-level Help Links.
TS530H	Window Position (if provided) requires both Row and Column.	A window row has been provided without a window column, or a window column has been provided without a window row. Both are required to override the default window position.
TS530I	Requested Base Help Link not found.	The Help Link identified for use as a Base Help Link could not be found in the database. Make sure the Application, Screen, Row and Column values are accurate.
TS530J	Requested Base Help Link not available - it uses a Base Help Link.	A Help Link that uses a Base Help Link cannot be used as a Base Help Link itself.
TS530K	First Level help for this Help Location not found.	There is no first level help topic for this location.
TS530L	A Help Link cannot be based on itself.	A Help Link cannot use itself as a Base Help Link.
TS530M	A Help Link that uses a Base Help Link cannot have Extended Help.	When a Help Link refers to a Base Help Link, it 'shares' the Extended Help of the Base Help Link. It cannot have Extended Help of its own.
TS530N	<User> is not authorized to define help links for <Group> topics.	The user who attempted to define a Help Link is not authorized to do so in the associated Help Topic's Group. Consult the Group Administrator.
TS5401	Help Link not found.	The specified help link is not found on the server.
TS5402	Help Link cannot be deleted - Extended Help exists.	This Help Link has Extended Help Links attached to it. The Extended Help Links must be deleted before the associated first level Help Link can be deleted.
TS5403	Help Link cannot be deleted - used as a Base Help Link.	This help link is used as a Base Help Link by other Help Links. All Base Help Link references to this Help Link must be changed or deleted before this Help Link can be deleted.
TS5404	<User> is not authorized to delete help links for <Group> topics.	The user who attempted to delete a Help Link is not authorized to do so in the associated Help Topic's Group. Consult the Group Administrator.
TS5405	Update user required.	Please provide the id of a user with update rights.
